Print and Apply Solutions

Description

Print and Apply models that utilize the latest in thermal transfer technology from Avery, Zebra, and Sato make Accraply the right choice for your print and apply project. Whether your application is low speed/semi-automatic, or fully automatic/high speed, our systems offer clear text and 100% readable barcodes.

Applicators to cover the complete range of print/apply configurations, plus our engineering expertise, can provide solutions for standard and "one off" customs applications.

Desktop Printers from Avery, Zebra, and Sato compliment our line of printer/applicators. Accraply also offers a complete line of replacement OEM print engines and parts.

LabelView Software is used to support our range of printer/applicators and printers. LabelView is the number one choice in label design and database management software and includes more than 30 different barcode symbologies.

Network Connectivity is a growing demand on today's production lines. If your print and apply application requires interfacing to your primary manufacturing or warehousing software, communicating with a PLC, controlling multiple printer/applicators with a single PC, or accessing multiple databases, then you need Accraply's Middleware solution. Middleware applications can be tailored to each client's needs for flexible and complete systems integration. Middleware is compliant with FDA regulations for audit trails (ERES) and provides the power you need to control, track, and report production.

Standard Accessories such as barcode scanners/verification as well as custom solutions, including vision systems, are available from Accraply.

Aftermarket Support is important to you. For this reason Accraply maintains a complete inventory of spare parts and ribbons and can provide you with on-site service and training by qualified and experienced service technicians.

All specifications and tooling requirements are subject to Accraply evaluation of all label and product samples. Specifications shown reflect standard machine capabilities. Accraply can also meet other specification requirements. Please call for details.

Machine Specifications

PRINTER/APPLICATORS	PRINT ENGINE	LABEL WIDTH
■ MODEL 720:	Avery	Up to 4"
■ MODEL 924:	Avery	Up to 6"
■ MODEL PA:	Sato & Zebra	Up to 7.2"

APPLICATORS

■ WIPE-ON, TAMP, BLOW-ON, TAMP/BLOW, DUAL TAMP, CORNER-WRAP, LEADING/TRAILING SWING TAMP

OEM REPLACEMENT PRINT ENGINES AVAILABLE

■ AVERY:	Model DPM
■ ZEBRA:	Models 110 & 170 PAX 3
■ SATO:	Models 8485Se, 8490Se, 8459Se, & 8460Se

DESKTOP PRINTERS

|	
■ AVERY:	All current Novexx models
■ ZEBRA:	All current SL & XiIII plus models
■ SATO:	All current CL models

LABEL DESIGN AND DATABASE MANAGEMENT SOFTWARE
